## Product Features

### HIGH PERFORMANCE HORNADY® BULLETS

From the InterLock® SP-RP bullets to the heavy-hitting DGS® and DGX® bullets, each Dangerous Game™ Series load is topped with a deadly projectile.

#### InterLock® SP-RP Bullets

SP-RP stands for "spire point - recoil proof," and the design of this bullet eliminates the problem of tip deformation during recoil. These heavy-duty InterLock® bullets combine rugged design with improved trajectory in dangerous game rifles.

#### DGS® Bullets

The DGS® non-expanding bullet is recommended for thick-skinned game such as elephant, rhino and hippo. Its tough copper clad steel jacket is designed to provide maximum penetration from all angles on thick-skinned and heavy boned dangerous game animals.

#### DGX® Bonded Bullets

DGX® Bonded bullets are built to the same profile as the corresponding DGS® (Dangerous Game™ Solid) bullets but expand to 1½ to 2 times their bullet diameter. They feature a copper-clad steel jacket bonded to a lead core to provide limited, controlled expansion with deep penetration and high weight retention. Bonding the jacket to the core prevents separation from high-energy impact on tough material like bone, ensuring the bullet stays together for deep expansion.

#### POWDER

Powders are carefully matched to each load to ensure optimum pressure and velocity, and to regulate in double rifles. Some of our Dangerous Game™ Series loads feature Superformance® propellant technology.

#### CASE AND PRIMER

Like all Hornady® ammunition, our Dangerous Game™ ammunition uses the highest quality cases and primers available. Consistent components translate to consistent shooting in the field.
