## Ambush

Description	Additional information
Reviews (9)	Q & A (3)

The all-new Ambush is a purpose-driven handgun rest. The Ulanzi U-190 fluid head is the driving feature. The all-metal construction of this fluid head paired with our aluminum base and bracket make this the toughest handgun rest we have ever designed. The first thing you will notice is the butter-smooth action the fluid head provides. Both the panning and tilting features are ultra smooth adding just the right amount of resistance to improve your down-range accuracy. Speed and versatility are just as important as hitting your target. The Ambush is made to go anywhere and hunt using any style. Choose your favorite high quality tripod for stationary hunting or go with a monopod for the ultimate light weight kit. Tree stand... No problem. Rocky Mountains....Right at home.**The Control Freak Bag is included with each rest.** Please watch this **video** after you receive your rest. weight 3.2 lbs

Choosing a tripod is a personal choice. It comes down to; budget, your height, and hunting style. I do my best each year to pick a tripod that will pair well with a particular rest at a minimum budget. This year I have chosen the

## Benro TAD18A Series 1 Adventure Aluminum Tripod

It is available at B&H Photo by clicking the picture or the name above

Hunting with a monopod under the Ambush Handgun Rest has quickly become one of my favorite ways to hunt with a handgun. Every year new offerings come out and I do my best to pair up a budget friendly model with out current model of handgun rest. This year I have chosen the
