Description

The Cedar Mountain Quick Loader is the ultimate fast-access speed loader on the market. Designed to be fast and easy to deploy this unique speed loader will ensure you can rapidly reload your muzzleloader without spills or hassle.

Built on a pivoting axis, the integrated funneling tube can be inserted into the muzzle before any powder is released making it completely spillproof when operated correctly. Once the funneling tube is inserted in the muzzle simply pivot the powder charge tube upward until the funneling tube and powder charge tube are in a straight line. The powder will rapidly funnel into the muzzleloader without static clinging, ensuring an even and consistent reload.

In addition to the powder loading function, the Cedar Mountain Quick Loader also features a fast-access bullet container that allows you to quickly follow up your powder charging with the projectile seating in one smooth motion. For a great visual of how this process works please check out the video above.

This package deal comes with the Quick Loader, three charge tubes and a cloth pouch to store all of it when not in use. If you have been searching for a solid speed loader that works great with loose powder and easily fits in your pocket or possibles bag, this is the product for you.

Quick Reload
Works awesome for a quick reload under stress. Tube fits down barrel so no spilling with shaking hands.

Quick Loader
A well-thought-out, well-designed product, which will not allow any loose powder loss regardless of wind conditions. An absolute must if your MZ is equipped with a muzzle brake. There is nothing else like it in the marketplace.

These things are great!
First year running the Cedar mountain quick loader. It ran flawless, and it's fast if you are needing that follow up shot. 10/10 recommend.
