SKU: HGHP 45 240

★★★★★ 2 reviews

50ct

This 240 grain HG Raptor designed for handguns requiring a .4515" diameter bullet is an excellent choice for hunting applications.

After 1.5 - 2" of penetration four blades are engineered to shear off and radiate out in a star pattern while the Blunt Trauma Base continues to penetrate 20 - 24" in ballistic gel. This action greatly increases trauma and stopping power.

Loaded in a 460SW. Worked great on my elk. Complete pass through with a wound channel that exceeded tradition JHP designs that I have used in the past. I will be sticking with this bullet. Blog link to the hunt details.

great accuracy! haven't got to use them hunting yet but from what I see in testing and what I've heard there will be no issue on putting down game!
