

EXTREME SUMMIT

Light Weight

Accurate

Ideal for Back Country

The Extreme Summit custom rifle build is one of our slimmer, more traditional style rifle builds that we offer. If your goal is to stick with a Remington style, traditional build with a slim forend, this build is for you. Built around the well known McMillan Hunter stock, it features a sloped Remington style grip along with a Monte Carlo style comb and cheek. Similar to our Ascent, this configuration is great for staying slim and getting your rifle in and out of slim cases like horse scabbards on backcountry hunts. The Extreme Summit is fully customizable from barrel type, stock colors, cerakote colors, and more.

THIS RIFLE IS
EQUIPED WITH A
MCMILLAN HUNTER
CARBON STOCK.

BUILT ON THE MOA
EXTREME ACTION,
BUILT BY DEFIANCE
MACHINE.

KEY FEATURES

- 5.6 lbs – 6.5 lbs. Weight depends on barrel type and length

STOCK COLOR OPTIONS

You have the option to either stick with the color option viewed above or select from an assortment of colors from out stock manufacturer. Click the button to the side to choose other colors. All carbon fiber stocks can be finished with carbon ambush, banded carbon, or painted patterns.

Choosing a custom color that different than the color listed on the website can lead to longer wait times.
