

More information about Speedloader Swift

Designed for speed and comfort

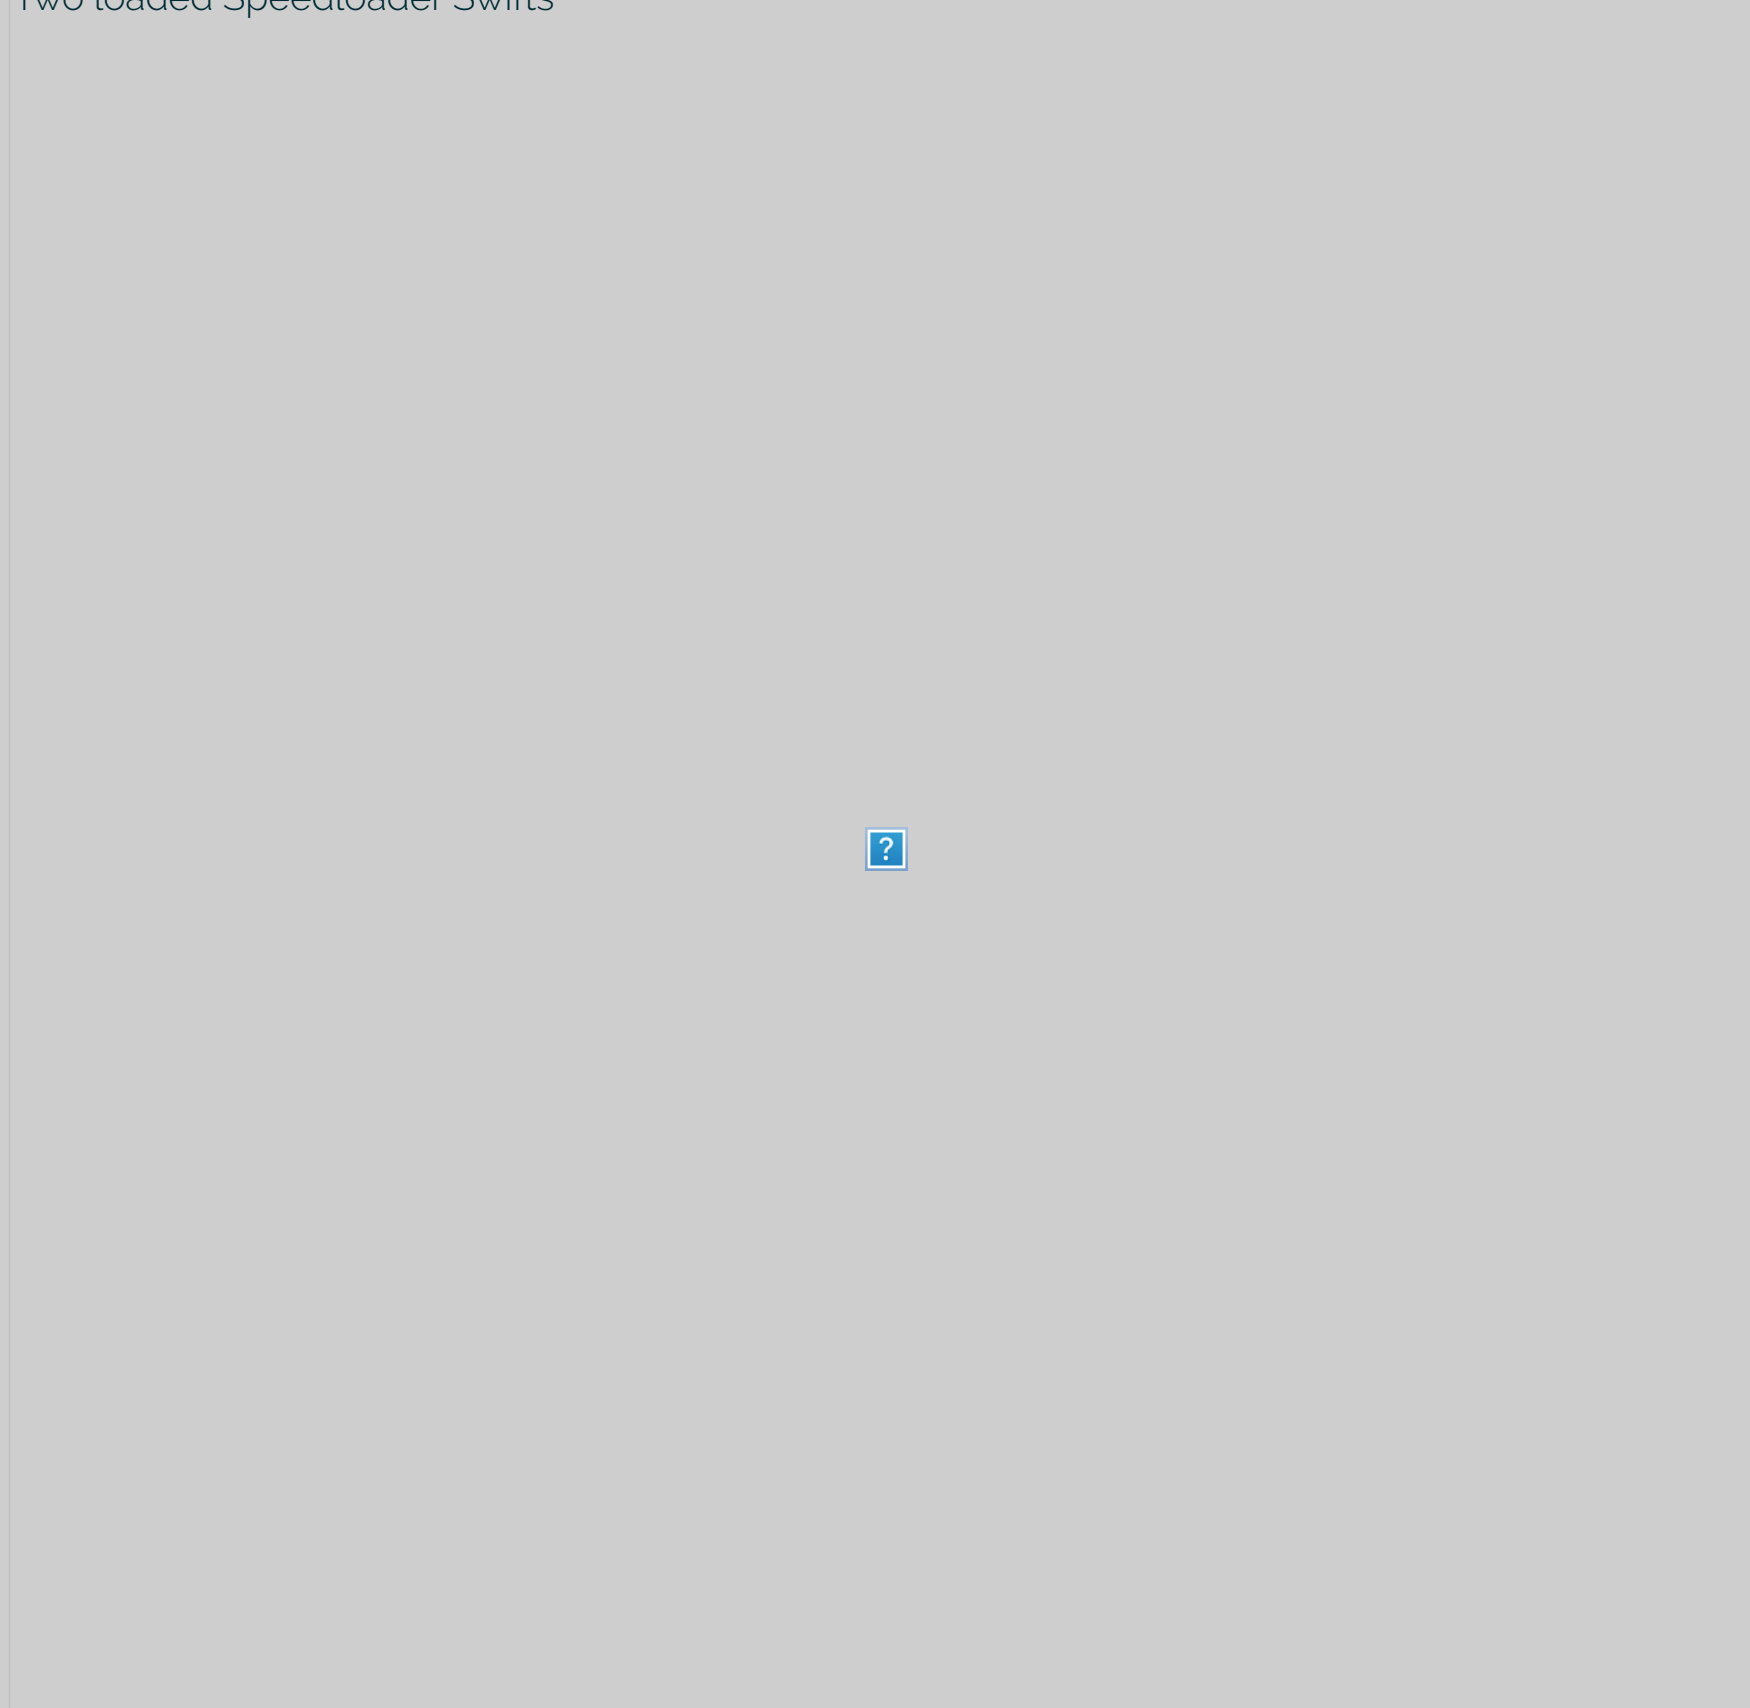

Speedloader Swift cuts the time needed to re-load a double barrelled shotgun.

It is specially designed to be held in the hand throughout aiming and firing so that cartridges are immediately available for the next load.

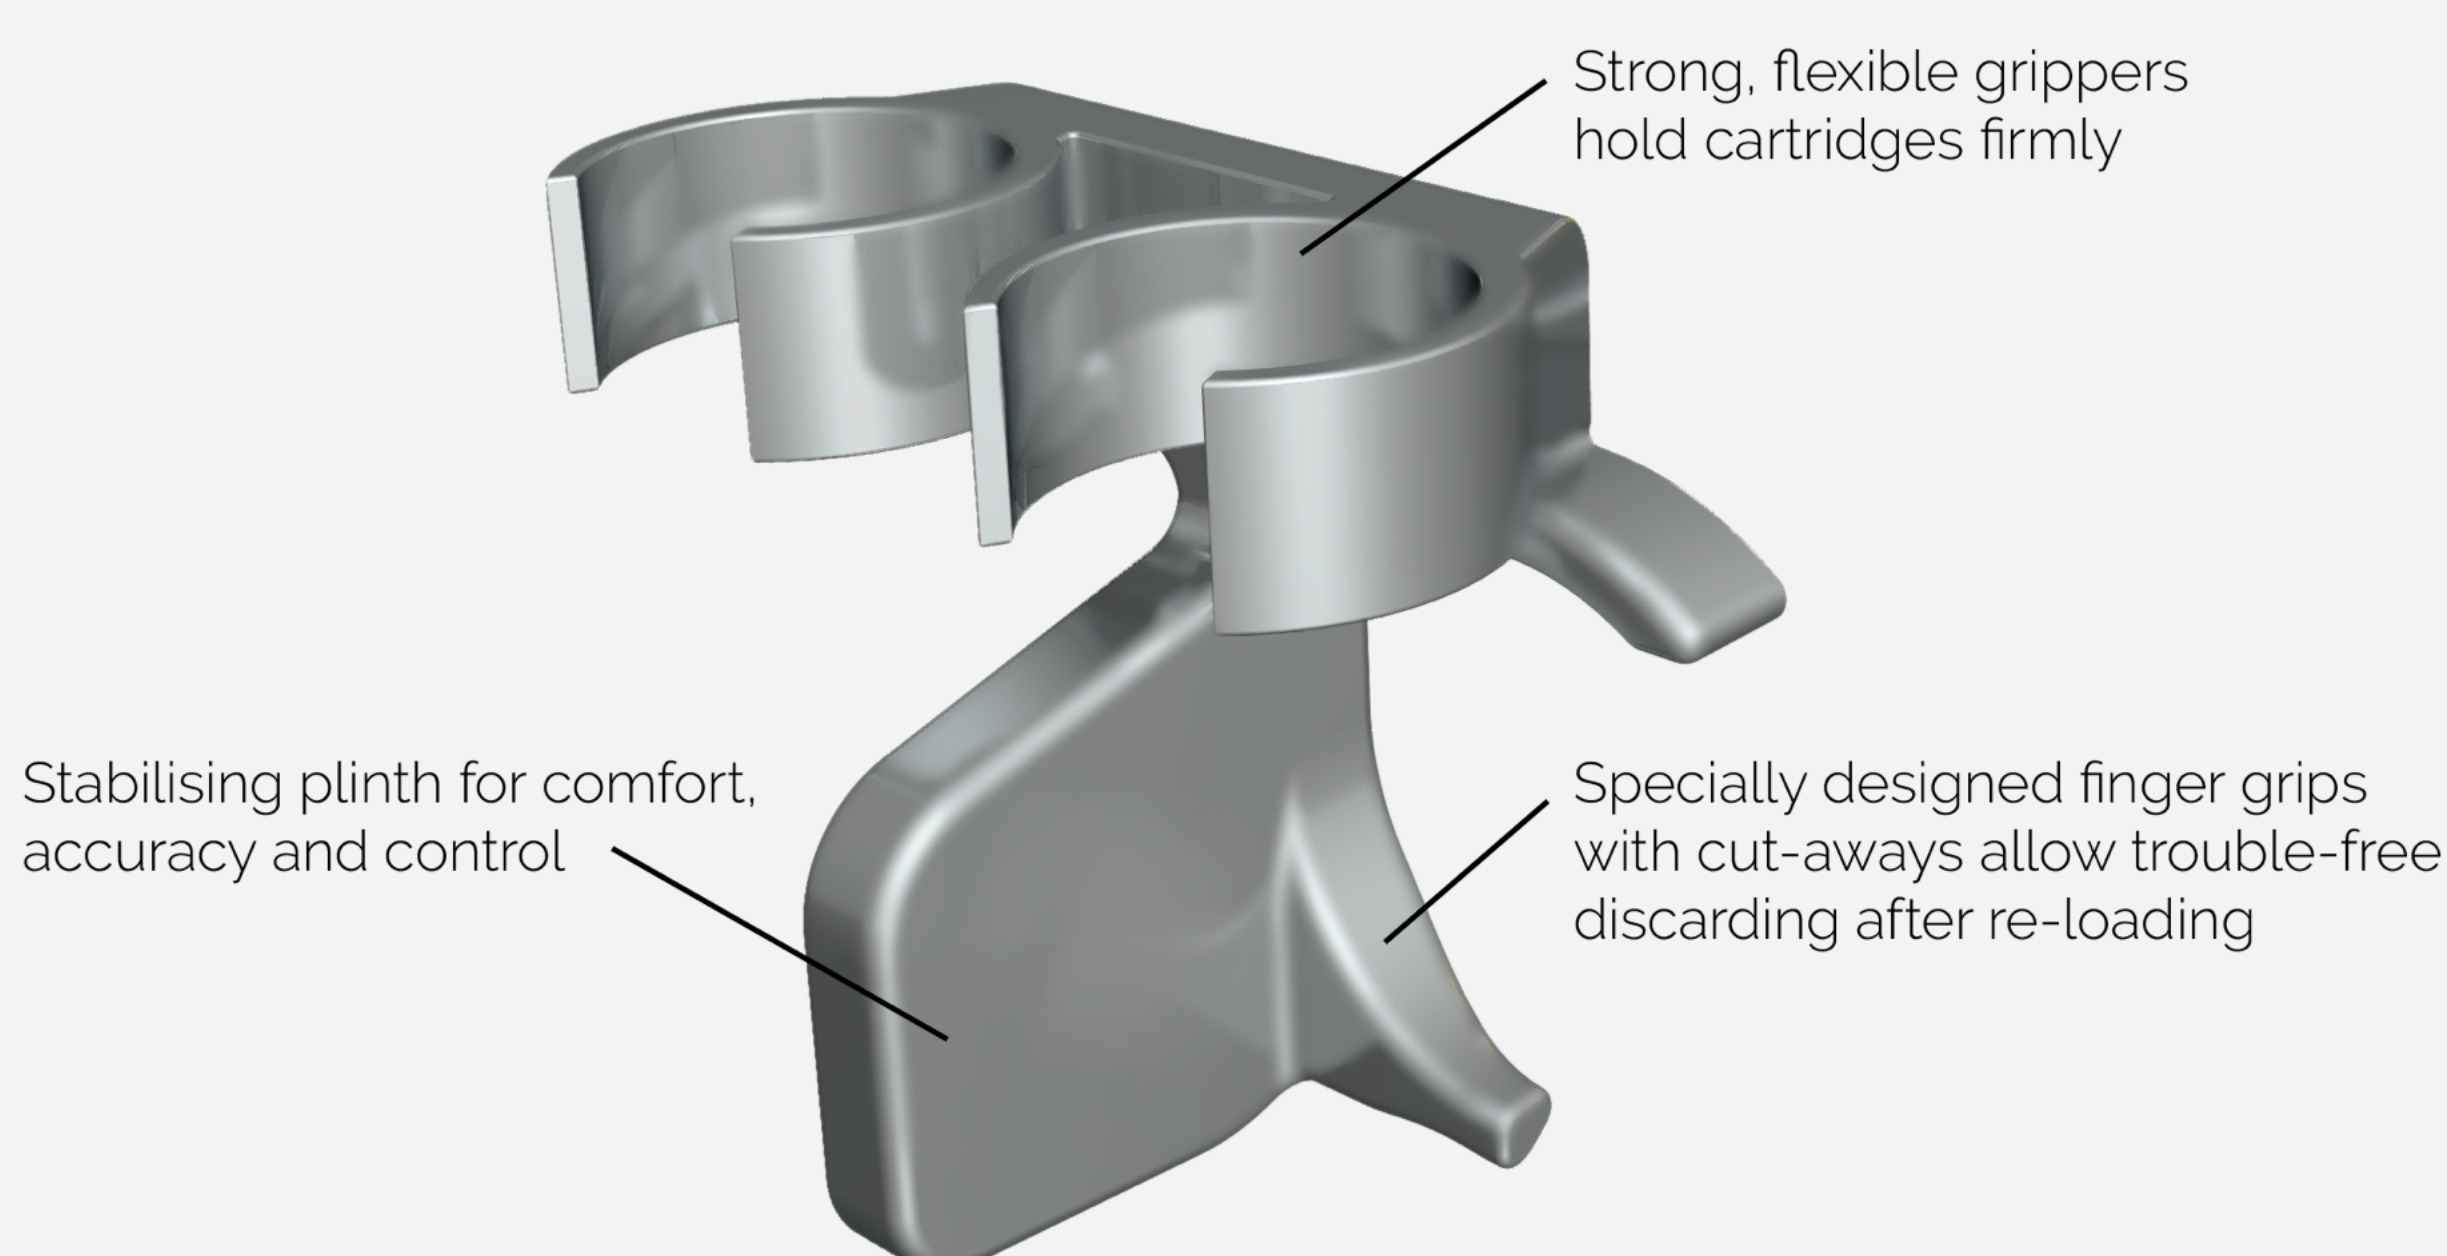

Made from super-strong polypropylene; the most flexible and durable material available. Speedloader Swifts are virtually indestructible - In normal use they will probably last for ever.

Speedloader Swifts are in use throughout the world, in all climates from arctic to tropical and always delivering outstanding performance.

Two loaded Speedloader Swifts

Unique patented design

Slide-and-release reloading action

Re-loading is a smooth, swift action.

Slide in the shells, a flick of the wrist and you are back in the game.

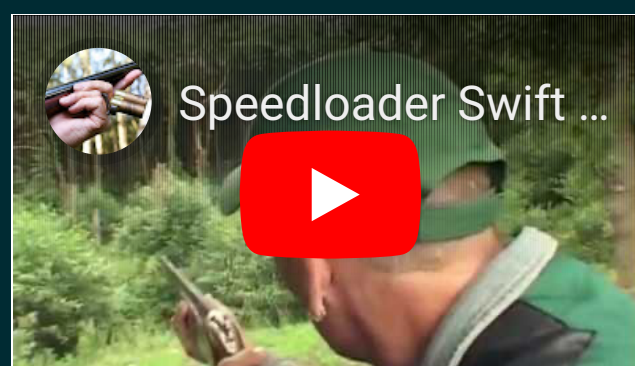

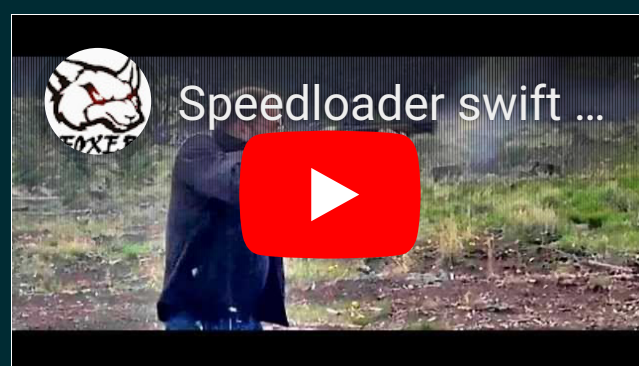

To drop the Swift just open your fingers.

Use with a cartridge belt

Clip a few Speedloader Swifts onto a loaded belt. Perfect for driven game or clay flurries.
