SKU: OT1010

Category: Outside

### DESCRIPTION    ADDITIONAL INFORMATION    RESOURCES

Turns your case neck concentric to its true axis, unlike hand-held neck turners, which are centered only on the pilot.

Use after the case neck has been resized and expanded. The Outside Neck Turner Accessory mounts onto an Original or Power Case Trimmer.

- Adjustable, circular **Carbide Cutter** provides years of reliable use
- Installs over the Case Trimmer **Cutter Shaft**
- To operate, you control the rate of feed by rotating the feeder cam while a cam follower controls the length of the cut
- To change calibers (any diameter from .204" to .375"), simply insert the correct **Pilot** and make the necessary adjustments to the Carbide Cutter
- Properly adjusted, will turn necks to within a tolerance of  $\pm.0001"$
- Cases longer than .375 Magnum (2.94") require a Long **Case Trimmer Base**

#### KEEP IN TOUCH

#### OUR CUSTOMERS SAY

“ I just counted the number of Forster case trimmers I own – there are 31 of them, and two of them say ‘Forster Brothers.’ Note that I don’t plan on selling ANY of them in the near future because I still use them all.

Arcadia, WI
