QUALITY from TRADITION

Since 1867,
we have manufactured
high quality accessories
for hunting rifles.

QUALITY from TRADITION is far more than just a statement.
To us, it means dedication and commitment.

RECKNAGEL – Made in Germany

150 Years of RECKNAGEL

In 1867, our family business started the production of sights and accessories for the gun industry in Suhl, Thuringia. After the end of World War II and the expropriation by the Soviet occupying forces, the company relocated to Schweinfurt, Bavaria.

Scope mounts for hunting rifles were added to the product range and have been an essential part thereof ever since.

In 2010, RECKNAGEL launched their line of tactical mounts and accessories for the civil sector and law enforcement under the brand name “ERATAC®”. Decades of experience, as well as the continuous exchange with users, led to the steady expansion of our product range.

All ERATAC® products are manufactured according to military standards, thus meeting highest requirements, and have proven themselves on various weapons systems worldwide.

In 2016, we continued our expansion of the hunting product range and started manufacturing suppressors, which are distributed under the brand “ERA-Silencer”.

As a traditional family business, we rely on both sustainable quality and cutting-edge technology. A continuous investment led to computer-controlled systems of the latest generation, which guarantee 100% quality “Made in Germany”.
