Description:

serial #611067, 7X64, 23" barrel with a bright, likely unfired bore. This rifle is in as-new condition with no visible signs of wear. Rifle features a blued finish and the bolt body remains bright and is numbered to the receiver on the underside of the handle. The checkered walnut Monte Carlo stock features a satin oil finish, swivel studs, and a solid red recoil pad. There are no provisions for sights, the receiver is grooved for mounts. The original box, with correct end label and Styrofoam insert is included and contains the manual. A terrific example of these Hunter series rifles that was imported by Stoeger, built on the quality AV action and is chambered in a classic European cartridge. (4A11728-1592) {MODERN} (800/1200)
