

TRIJICON RMR OFFSET MOUNT

The AD-RMR-OFFSET mount is available in 33 and 45 degree offsets, with Right or Left hand mounting. Left Hand mount will place the optic on the Left Side of the rifle. Right Hand mount will place the optic on the Right Side of the rifle. The mount requires ½ of clearance under the scope tube or eye piece to fit under the scope.The base is 1.35” long. The 33 degree model was designed specifically for use with the ACOG Optic. The 45 degree is for use with scopes with large adjustment caps. It is precision machined from 6061 T6 aluminum and finished in hard coat T3 Mil-Spec anodize. It features the Patented QD Auto Lock™ Lever system to accommodate both in-spec and out-of-spec rail systems.

FFL Terms and Conditions - Any items placed on the same order as a firearm/lower receiver will also be shipped to the FFL. If you would like additional items shipped to you directly, please place them on a separate order. To expedite your order, please have your dealer fax or email their FFL to us. If the dealer you are using to transfer a firearm has not sent us a currently updated FFL to put on file, there will be an extended period of time needed to process your order. Due to the high volume of orders, please allow up to two weeks for delivery of firearms. Email: sales@admmfg.com.
