Wolff Extra Power Firing Pin Spring Winchester 70

★★★★★ (8) Write a Review Q&A (3)

Product #: 567848 | Manufacturer #: 65430 | UPC #: 197706567848

Our Price: \$6.99 Available Ships tomorrow from MidwayUSA When will it arrive? Weight: 30 lb Compatible With: Winchester 70 Post-64 Long Action, Winchester 70 Post-64 Short Action Add to Cart Add to Wish List

Product Overview

These extra-power striker springs make the striker move faster and hit harder to reduce misfires and lock time. To the shooter, the faster the firing pin strikes the primer, the tighter the group.

Regarding Winchester firing pin springs what is a no. 25 ?? Asked by Brian 6 months ago

does this spring have to be cut to fit? I have a newer Winchester model 70 sporter and the factory spring is shorter than the one I purchased. it says it for a long action or short action post 64 model 70? Asked by Corey 1 year ago

Product Owner - monskinator No, don't cut to fit. The original spring probably started out the same length but is shorter due to the compression. I had a rifle with light primer strikes and replaced the spring at first with a different spring and after replacing it again with the wolf, the 1st replacement spring was the same length as original due to use. At least this was my experience.

Will this spring work with the new production Winchester Model 70 Safari Magnum? Thanks. Asked by Bill 3 years ago

Product Owner - greatwhitehnr Yes it will. You just need to order long action for long action or magnum or short action for short action or short mag.

Works Replaced the firing spring on my Winchester Model 70 (Post-65), works like a charm. Submitted 10 months ago By Kevin From Missouri Verified Buyer

Quality This spring is a replacement for a Winchester model 70 rifle firing pin spring. I purchased a new Winchester model 70 rifle in 264 win mag. It would not fire. Submitted 4 years ago By Tom From Indiana Verified Buyer

Would definitely use this again A little tricky to install, but that's why we're gunsmiths. Works great Submitted 5 years ago By Mean Gene From Mn Verified Buyer

Wolff is a 'standard' in the industry 'Blitzschnell'... sez it all. Combined with an aftermarket firing pin, this drastically reduces lock-time and increases ignition reliability. Submitted 7 years ago By Snocamo From Montana USA Verified Buyer

Fit perfectly. It was quite a bit longer than the original factory spring I took out. Didn't look like a snake when I was done. Submitted 8 years ago By William From NE OH Verified Buyer

No More Light Strikes Had a problem with primers not igniting with old factory spring. Now with the Wolff Spring it strikes with authority. Submitted 8 years ago By FakeMidwayName From NE Arkansas Verified Buyer

FIXED MY IGNITION PROBLEMS I have a Winchester M70 in 300 H&H that was misfiring with Winchester primers. Submitted 9 years ago By William From Ft Winwright AK

It definitely sped up ... It definitely sped up lock time and cut down on primer setback into the firing pin hole. Submitted 12 years ago By Ed From Marion, MT
